A RESOLUTION

- WHEREAS:** The ambiguity of Regent Fowler's resolution imposes on the administration the responsibility of establishing and assessing differential tuition rates, without proper justification; and,
- WHEREAS:** Basing tuition on actual education costs would result in expensive and unnecessary burdens on the administration; and,
- WHEREAS:** Basing tuition on starting salaries, career opportunities and related ill-defined criteria is both unworkable and unnecessary; and,
- WHEREAS:** Expanded use of differential tuition would further divide an already segmented student population along educational, social, and economic lines.

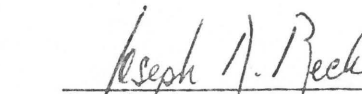

THEREFORE BE IT RESOLVED by the Executive Council of the University of Colorado Student Union, THAT:

SECTION 1: We strongly oppose differential tuition on the basis outlined in Regent Fowler's resolution (see attached).

SECTION 2: We support the UCB student body position paper.
