BILL HISTORY

In fiscal year 87-88 the student fee guidelines prohibited the allocation of student fees for meals, lodging, & registration fees for out of state travel. This clause was included in the original guidelines to encourage fiscal responsibility. Subsequent to the removal of this clause, large amounts of money have been allocated for activities other than travel. The phrase "where the exclusion of such will prohibit travelers from participating in activities integrally involved in the purpose of travel" is extremely vague and over-used.

In addition, the By-Laws still prohibit the allocation of Student Fees for meals, lodging & registration fees. This contradicts the Student Fee Guidelines. The student fee guidelines should be changed to eliminate contradiction.
