A BILL

BILL HISTORY

With Wardenburg now offering free AIDS testing and continuing to expand its educational base, distribution of free condoms to the university community is an integral element in preventing the spread of AIDS.

Currently 2 in 500 university students are infected with HIV. Within the next few years it is estimated that AIDS will be the number one killer of people in the United States between the ages of 25-44. Right now, one person is infected every 30 seconds and one person dies of an AIDS related illness every 12 minutes world wide.

As students and representatives of the students we can no longer sit back and allow AIDS to continue to spread because of ignorance, fear and lack of preventative measures. Please let us all do our part to stop the spread of AIDS NOW!
