### A Bill to Redefine Student Fee Payment Calculation

---

#### Bill History

Since the passage of 50 LCB 19, summer student fees have been calculated by multiplying the weekly fee with the number of weeks in that student's summer session. The Bursar has been able to accommodate this easily because summer sessions have typically fallen into only three categories (i.e., 5 weeks, 8 weeks, 10 weeks). However, there have been recent additions to these summer term lengths (e.g., 7-week courses), and the Bursar lacks the technological ability to accommodate this. Therefore, it is necessary to redefine how summer student fees are calculated.

---

#### Bill Summary

This bill redefines how summer student fees are calculated by placing weekly fee rates into weekly bins.

---

**THEREFORE, BE IT ENACTED by the Legislative Council of the University of Colorado Boulder Student Government, THAT:**

**Section 1:** Repeal and nullify 50 LCB 19.

**Section 2:** Student fee calculations shall be done in the following manner.

1. Take the approved CUSG Cost Center Budget approved by Legislative Council
2. Subtract out the Costs of Bonds
3. Subtract out the estimated revenues for continuing education
4. Subtract out predicted interest to be accumulated
5. Add in fees for police, local schools, childcare, insurance, capital, refunds, waivers, bad debt, and any other predicted student fee expenses not included in the CUSG Cost Center Budget
6. To calculate the cost per week to full fee paying students to run our cost centers:
  - a.  $(\text{Predicted Fall enrollment} \times 16)$   
 $(\text{Predicted Spring enrollment} \times 16)$   
 $+ (\text{Predicted Summer enrollment} \times \text{Tier factor})$   
Predicted weeks of enrollment
  - b.  $(\text{Result from Section 2.5})$   
 $\div (\text{Predicted weeks of enrollment, from 6.a.})$   
Cost per week to full fee paying students
7. Multiply this number with 16 and add in the base fee to get the Fall/Spring semester fee for an individual student.
8. To determine the summer fee for an individual student, multiply the weekly fee with the tier factor described here:

Tier	Length	Factor
0	≤ 3 weeks	0
1	> 3 weeks – 6 weeks	5
2	> 6 weeks – 9 weeks	8
3	> 9 weeks or combination	10

**Section 3:** The bill shall take effect upon final passage in Legislative Council and upon either obtaining the signature of two Tri-Executives and the Legislative Council President or the lapse of six days without action by the Tri-Executives.

**Vote Count:**
